

2,779

forced leader elections
six cluster sizes

571

proof obligations
machine-checked, no axioms

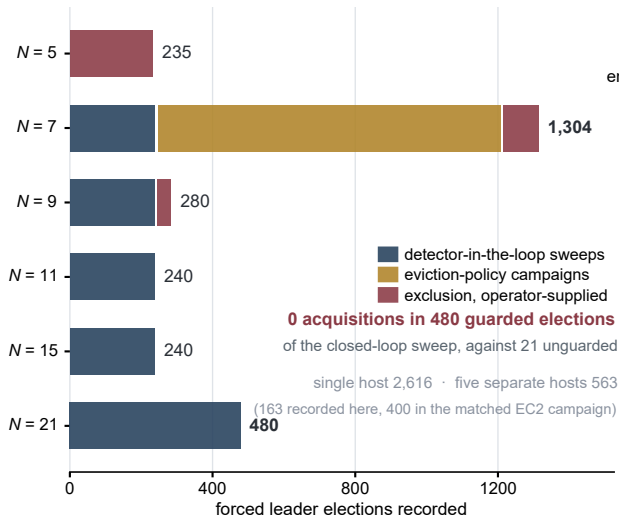

1,152

white-box attack runs
8 families $\times$ 4 floors

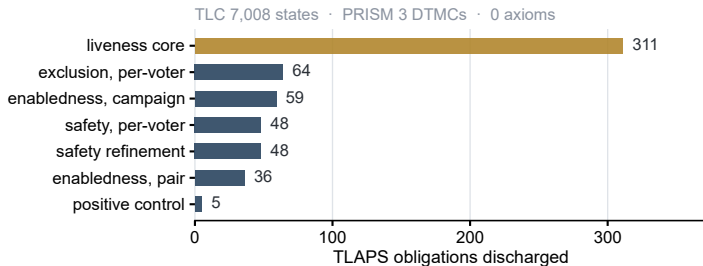

720

Caliper rounds
leader-cost campaign

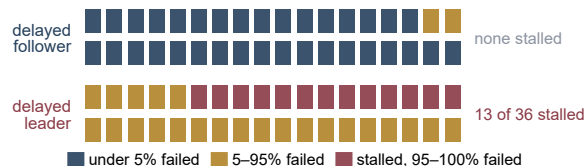

(a) the empirical scope

(b) the formalisation

(c) what the excluded node would have cost

one square = one paired run at 500 tx/s, against its own clean baseline
